DFDia Chosen to Design Inter-Tel's 200,000+ SF Valley Corporate Office

PHOENIX – Inter-Tel, an Arizona based company that offers top-of-the-line, technologically advanced communications software and hardware to businesses, has selected full-service Phoenix interior architecture firm DFDia to design its 200,000+ SF corporate office.

A location for the new facility will be identified upon completion of the programming phase of the design process, a period when designers identify specific client needs in relation to facility size and function.

“DFDia excels at the provision of full-service interior design work, which is of great benefit to clients like Inter-Tel whose needs are multi-dimensional,” says DFDia Principal and Managing Director Niki Possas. “We’re incredibly gratified to be selected by such a respected company as Inter-Tel and look forward to working with them to design an exceptional facility that meets all of its business needs.”

Voted the #1 commercial interiors firm in the Valley by Ranking Arizona, DFDia boasts a staff of 25 fully qualified professionals specializing in the fields of interior design and architecture.
